

ACTIVE-Zyme

Bio-Enzymatic Drain and clog releaser

**Keeps drain lines
and grease traps
flowing freely**

ACTIVE-Zyme is a blend of genetically modified microorganisms that rapidly degrades food waste and by-products which clog drain lines and traps. ACTIVE-Zyme is formulated with multiple strains of micro organisms effective against starches, proteins, oils and greases and other food residues

Salient features :

- Biodegradable and ecofriendly
- Safe and Natural
- Excellent odour control
- Fresh fragrance
- Keeps drain lines and grease traps flowing freely

SPECIFICATION :

Appearance	: Clear liquid
pH	: < 8
Stability range	: 17 to 40 Degree Celsius
Solubility	: 100%

Directions for use :

Clogged Traps : Pour 250 ml of ACTIVE-Zyme directly into the clogged drain system at night, in order that the trap or sewage line will not be used for a minimum of 6 hours. Flush with hot water. Repeat the process if clog is not cleared. If drainage is still not cleared it is likely that the clog is attributed to indigestible materials like plastic or sand that requires manual clean out or drain rodding.

Septic Systems : Pour 1 Ltr ACTIVE-Zyme directly into the toilet bowl and flush with extra volume of water . Doze after hours or late at night .

Usage Precautions :

High doses of cleaners, Bleach or disinfectants, antibiotic drugs or a sudden change in the pH of the system can kill off the micro-organisms rendering the system inactive. Ensure that no chemicals enter the septic system while ACTIVE-Zyme is in use.

Storage :

Keep in a cool dry and well ventilated area.

Screw on cap tightly after use.

Do not store along with oxidizing materials like Bleach, Alkali or toilet cleaners.

Keep out of reach of children.

First aid measures

Inhalation: Remove victim to fresh air. If necessary, use artificial respiration to support vital functions. Seek medical attention.

Skin Contact: If product contacts skin, wash skin thoroughly with soap and water after handling. Seek medical attention if irritation persists.
