## DISHWASHER GEL

### RIGOR DISHWASHER GEL

Rigor is a high performance dishwasher gel developed to work well with any dishwasher machines. With its superior formula Rigor dishwasher gel will take on the toughest of grease and grime on dishes leaving them spotlessly clean and fresh. Rigor's superior formula helps protect machine parts , safeguard china patterns and prevent corrosion of metals.

#### Salient features : Powerful Cleaning Action

Rigor is a concentrated high alkaline formula that strips away heavy grease, protein and starch foods.

- Reduce surface tension to penetrate and loosen soil.
- Tie up water hardness minerals to permit the loosened gel to do its cleaning job.
- Cuts through grease and grime easily
- Suppress foam caused by protein soils such as egg and milk.
- Protect china patterns and metals from the corrosive effects of chemicals and water.

#### Product Specification

Appearance	: Light green liquid
Form	: Gel
Nature	: Alkaline
Ph	: 13.5 to 14.0
Specific gravity	: 1.05
Detergency	: High
Foaming	: low
Odour	: Mild Fresh Citronella
Efficiency	: Effective in light, medium and heavy soil conditions

#### Dozing instruction:

Soft water	: 2 ml per ltr
Medium hard water	: 3 ml per Ltr
Hard water	: 4 ml per Ltr

### Directions for Use:

- Fill all the dishwasher cups as recommended
- Load dishware after removing food waste
- Soiled surfaces should face spray
- Rinse agent to be used for spot free finish.

When selecting your Rigor dishwasher gel, you opted for the best quality and performance. To achieve optimum results all the time, it is important to read through these lines.

Although dishwasher detergent must be used to soften the water effectively, suppress foam from food soils, provide the necessary cleaning and suspension of soil and protect materials being washed, underuse will result in poor cleaning, redeposit ion of soil, spotting, filming and possibly damage to some items being washed. Both the dishwasher instruction booklet and the detergent package provide guidelines for proper usage. A good general rule is to fill the detergent dispenser cup or cups to the level recommended by the dishwasher manufacturer.

It should also be remembered that water hardness in any area may vary from season to season and that more detergent may be needed than is needed at other times. Hence the dosing volume should be rightly opted. Hard water can leave your dishes look dirty even after running through a dishwasher cycle. Rigour dishwasher gel contains special water conditioning agents that helps counter this issue and to have sparkling clean dishware straight out of the dishwasher after each cycle.

### Energy Saving Tips

- Load dishwasher correctly for best results.
- Use recommended amount of automatic dishwasher gel.
- Operate dishwasher only when a full load is accumulated.
- Use shorter cycle for small amount of soil on dishes.
- Eliminate heat during dry cycle if water spotting is not a problem.

### Safety Tips

- Rigor is a highly alkaline product. Cause irritation and a burning sensation. Harmful if swallowed. Wear protective clothing, gloves, eye/face protection and suitable respirator if required.
- Store automatic dishwasher detergent out of the reach of children, never store automatic dishwasher detergent and other household cleaning products in low cabinets that are accessible to small children. An upper wall cabinet that is within easy reach for convenient use is safer.
- Add detergent just before turning on the dishwasher. Return the product to storage shelf immediately.
- On completion of the cycle, ensure that no residue is left in the dispenser cups. Clean out if necessary.
- Hot water is ideal for effective results in automatic dishwashing. Exercise caution to prevent possible burns and scalds.

**Shelf Life:** Stable for 24 months if stored in a cool and dry place away from sunlight.

**Storage :**

Screw on cap tightly after use in original container.  
Store in a cool dry place and away from direct sunlight.  
Store out of reach of children.

**Packing:** 5 Ltr / 25 Ltr

**Caution:**

1. Read label before use. Ensure that the product does not come in contact with any surface that is not alkali stable. Avoid spillage, it will etch, strip or bleach polished marble, limestone and concrete and may attack cementation material.
2. Do not mix with other cleaning chemicals. It is highly alkaline and reacts with acidic products and reducing agents.
3. Keep out of reach of children. Keep only in original container. Do not breathe dust, fume, gas, mist, vapours or spray. Wash hands, face and all exposed skin thoroughly after handling. Avoid direct release to the environment.
4. On spillage, wash with plenty of water and soap. If fallen on eyes wash copiously with plenty of water. If irritation persists consult physician immediately. If ingested, drink plenty of water and immediately seek medical attention.

**Temperature**

The temperature of the wash water is an important factor in dissolving detergent, removing food soils and drying dishes properly. To do these things most effectively, the water temperature at the dishwasher should not be lower than 130 degrees F (54.4 degrees C). As temperature is reduced, the removal of greasy and oily soils becomes more difficult; spotting and filming on dishes may occur as well as improper drying.

**First Aid Measures :**

Contains alkaline silicates and chlorinated materials.

May cause skin irritation. Wash with plenty of water.

If Ingested: If potentially dangerous volume of this material has been swallowed,

Get urgent medical attention.

Avoid contact with skin and eyes. In case of contact with skin and eyes flush with water. If irritation persists seek medical help.

**Important :**

Be sure to read all Directions, Safety and First Aid Measures on product labels before use of NEOSAN Active or any INCON product. If in doubt, get in touch with INCON customer service. Material Safety Data Sheets for all INCON products are available by visiting [www.inconproducts.in](http://www.inconproducts.in)

**Non Warranty :**

Manufacturer or seller of this product makes no warranty expressed or implied concerning the use of this product other than the aforementioned purpose. Manufacturer or seller is not liable for any injury or damage caused by this product arising out of misuse, misunderstanding or any application not specifically described and recommended on the safety data sheet.

**Guarantee :**

INCON's production and quality control system ensure uniform quality. However if dissatisfied with the performance of the product, you may return any unused portion for credit or replacement within 6 months of the date of manufacture.
